

*"Dogs Do Talk. We Humans Just Haven't Evolved Enough To Understand Them."*

We at K9 SECURITIES are professional and certified dog trainers and have a vast experience in training and handling all types of dogs, right from 3 months. Your pet will have a complete changeover after our training program. This is one of its kind here in Palakkad. We listen to your requirements very carefully and program our training accordingly. We never use any punishment methods for training as we are passionate for what we do. We can either come to your doorstep for training or you can leave your dog at our place for better results and we provide free boarding. In addition to training, we provide grooming for all breeds of dog.

#### WHY SHOULD I TRAIN MY DOG?

Dog training was viewed as a simple technique and that anyone with little knowledge, can do the job without the help of a professional, but this is completely a false notion and that there are sometimes life-saving values in finding the perfect trainer to train a dog in the right direction and provide much-needed guidance.

- A professionally trained dog will safeguard you, your family, and your property with utmost loyalty.
- Will not pull you while on walks. He can be controlled just with a command.
- A trained dog is easy to be cleaned and fed.
- A disciplined and trained dog is more loyal than an untrained dog. He will surprise you with his loyalty. A well trained dog is a happiness and asset to the owner and to the society.

A glimpse through our website will give you a better idea.

#### TIPS AND ADVICE FOR NEW DOG OWNERS

Welcoming a dog into your home and heart is of course loads of fun and excitement, but it owes to more responsibilities as well.

#### POINTS TO PONDER

- **Purpose Of A Dog For You**— Selection Of Breed: Each variety of breed dog is naturally a specialist in its own abilities. The purpose of you owning a pet is the key; whether you just want a playmate for your kids or you need one to safeguard your family and territory. So, make a wise decision before selecting a breed as you don't want him to be a burden for its lifetime because of your wrong choice.
- **Health Of Your Dog**: Keeping a health record/card and a regular veterinarian for your dog is a must for the healthy well being of your pet.
- **Selecting A Puppy**: Selecting the right breed and puppy for you is not an easy task. Choose the right breeder, have a thorough discussion with him about your preference and never buy a puppy from a puppy mill.
